

DATA PRIVACY AND SECURITY PRACTICE GROUP

Data privacy and security is increasingly important to your business and that of your clients. A stolen laptop, credit card data theft, employee embezzlement, or a hacker with access to your company's website or private databases can be a significant threat not only to your clients, but to your valuable reputation as well. Every breach comes with potential liabilities. That's why the Kaufman & Canoles Data Privacy and Security Practice Group is standing by to respond to your company's needs, regardless of your size or industry. You may reach us at any time by calling or emailing our hotline - (844) 417.3309 or cyberhotline@kaufcan.com. We provide unparalleled legal service, relentlessly advocating for our clients throughout the entire process—from theft prevention to aggressive litigation.

WHO WE ARE

Our Data Privacy and Security Practice Group has command of numerous data privacy laws, regulations, standards and related issues. We are experienced in the areas of commercial law, corporate finance, business litigation, government contracts and health care laws and regulations. We have built our team with attorneys across disciplines, each with individual knowledge of technology, e-commerce, information security, health care and litigation. We have active relationships with top quality specialists and forensic experts that provides a comprehensive approach to proactive prevention to a well-orchestrated response should a breach occur.

WHAT WE DO

The Kaufman & Canoles Data Privacy and Security Practice Group recommends a preventative approach by ensuring that our clients are compliant with all internal controls and security measures. This includes laws such as HIPAA and the federal Computer Fraud and Abuse Act, as well as other industry-specific rules and regulations. Preparation is vital. For health care providers, we have developed a template that enables you to comply with the HIPAA regulations.

Our secondary goal is to help you discover and eliminate system weaknesses, therefore reducing the risk of future cybersecurity breaches. This occurs within the confidentiality of attorney-client privilege, allowing us to bring in specialized IT professionals who can search for hidden vulnerabilities. The technology experts, with their knowledge of leading-edge systems, allow us to assist clients in need of a legally sound and effective data protection plan. By taking corrective and preventive action, Kaufman & Canoles attempts to avoid future litigation.

Finally, our Data Privacy and Security Practice Group can go to work immediately when the unfortunate circumstance of a breach occurs. We respond promptly with legal advice, assisting your company as it navigates the murky waters of compliance requirements. We guide our clients through the notification process, as well any government investigations. We defend our clients' interests and limit the multiple liabilities in the event of claims. If the hacker is identified, we will aggressively seek damages.
