- Greetings & Overview
- The Good News
- Policy Generally Defined
- Policy as Defined by NCUA
- Master List of Policies
- Required Policies

Policy Generally Defined

- A product of wisdom in the management of affairs.
- A definite course or method of action selected from alternatives and certain conditions to guide and determine present and future decisions.
- A high level overall plan embracing the general goals and acceptable procedures.

Synonym: strategy; principle; rule

Policy Defined (continued)

- From Wikipedia

A **policy** is typically described as a principle or rule to guide decisions and achieve rational outcomes. The term is not normally used to denote what is actually done, this is normally referred to as either **procedure** or **protocol**. Policies are generally adopted by the Board whereas procedures or protocols would be developed and adopted by senior executive officers. Policies can assist in both **subjective** and **objective** decision making.

Board Duties and Responsibilities

- Policies and Planning:

“Plans and policies are the board’s major tools for influencing the direction of the credit union. Board and management work to explicitly define the credit union’s vision. Then they develop broad plans for turning that vision into reality. The board has final say in adopting plans and policies, although it’s the responsibility of management to recommend policies and policy changes.”

- Source: Credit Union Board of Directors Handbook

Policy as Defined by NCUA

- It is important to remember that even if there is no regulatory requirement for Board approval, the Credit Union Board still has the ultimate responsibility for the operations of the Credit Union.
- The NCUA Examiner's Guide states "The Board must approve all **major** policies. Further, it should review, and if necessary, update those policies at least annually."

Another Perspective

1. We have been through a lot of documents/regulations and found that 'Board Approval' is not required for a great number of the items.
2. What is required is that the 'credit union' establish a policy that addresses each of these issues.
3. Policies can be established by Management to meet the requirements of the regulations and do not necessarily have to flow from/through the Board.
4. We have identified policies established by Management as 'Operating Standards.' In doing so we do not have to seek Board approval to change these as situations arise and it relieves the Board from having to address these issues on a recurring basis.
5. Each of the Operating Standards has a review period where Management must update them to assure they meet regulatory requirements.

Anthony Demangone

- “Not making decisions. Listen, investigate, seek suggestions, but whatever you do, decide.” Dan Rockwell
- “So go ahead and act as if your decisions are temporary. Because they are. Be bold, make mistakes, learn a lesson and fix what doesn’t work. No sweat, no need to hyperventilate.” Seth Godin
- “There you have it. Fish, or cut bait. Use due diligence. Do your homework. But by all means, decide. Make a choice. It will provide clarity, efficiencies, and a new direction.” Anthony Demangone
