

## ENERGY & RENEWABLE RESOURCES

Our Energy & Renewable Resources Team is dedicated to helping clients understand the changing demands of renewable technologies. We are focused on bringing the future of renewable energy to Virginia and helping our clients successfully navigate the changes in business practices and legislation that accompany best practices in alternative energy.

### WHO WE ARE

At Kaufman & Canoles, our attorneys have the experience and the unstoppable drive to guide our clients as they navigate the challenging world of renewable technologies – including solar, onshore, and offshore wind. We’ve spent years advising landowners, developers, financiers, manufacturers, and regulatory bodies across Virginia, offering guidance at every project stage. Whether you need advice on planning, permitting, leasing joint ventures, project management, or other components of the renewable energy business continuum, we can help minimize controversy and risk, diminish costs, and increase success.

### WHAT WE DO

Our multi-disciplinary Energy & Renewable Resources Team attorneys serve as counsel and advisors to those looking to advance their renewable energy needs. With backgrounds in real estate, land use, commercial law, eminent domain, mergers and acquisitions and environmental law, we are prepared to lead our clients through the challenges of project planning, permitting, development, and financing their movement towards renewable energy.

### AREAS OF CONCENTRATION

- Solar energy
- Onshore and offshore wind
- Advisement on renewable technologies
